10. YOUR SOLUTION

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.
If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.

Users can able to add their monthly income in their wallet in this application.
They can set the limit in the wallet so that they are not spending more money on unwanted things.
If they are exceeding the amount in the wallet or the limit amount then the user will be notified through email

SL

8. CHANNELS of BEHAVIOUR

8.1 ONLINE
What kind of actions do customers take online? Extract online channels from #7

This app makes user to set a budget for each category and receive alerts when the limit exceeds and also provide report of their expenses and budget in terms of graph. So these are the better ways to realize where they are spending money.

8.2 OFFLINE
What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

Writing everything outside hand is too much work. So doing everything on spreadsheet and apps saves lot of time. Users may lose their current or past budget, they don't want to do the math by hand. By using this app, user don't have to remember to bring budget note everywhere.
